

3RD INTERNATIONAL CONFERENCE ON ENTREPRENEURSHIP, INNOVATION & REGIONAL DEVELOPMENT

ICEIRD 2010

will be held in
Novi Sad, Serbia
organised by

University of Novi sad - Faculty of Technical Sciences

UNIVERSITY

The University of Novi Sad is the second largest university in the country. Founded on June 28, 1960, it is considered to be an autonomous, educational, scientific and cultural institution.

There are 14 faculties within its structure, located in four towns in Vojvodina: Novi Sad, Subotica, Sombor and Zrenjanin. The University is situated in the campus on the left bank of the Danube. It covers an area around 260.000 m², encompassing 7 faculties, a student centre, an institute of students' health care, two students' dormitories, apartments for temporary accommodation of the young teaching staff, a central students' restaurant, recreation centre, Universities students' organizations and other research, informative, cultural and sport organizations. Over 40.000 students are studying at the University and over 3.000 professors, collaborators and technical assistants are employed there. The Faculty of Technical Sciences is the largest faculty at the University of Novi Sad.

Welcome to Faculty of Technical Sciences

The Faculty of Technical Sciences was founded on 18th May 1960 as the Faculty of Mechanical Engineering in Novi Sad and was originally a part of the University of Belgrade. When the University of Novi Sad is founded on 28th June 1960, the Faculty, together with six other faculties founded by that time on the territory of Vojvodina, becomes its constituent part.

The establishment of the Department of Electrical Engineering and the Department of Civil Engineering was the reason for the change in the name of the Faculty into the Faculty of Technical Sciences on 22nd April 1974. Since then the Faculty also developed the programs of study in the areas of:

- Traffic Engineering - in 1979
- Architecture - in 1996
- Industrial Engineering and Management, Environmental Engineering and Graphic Engineering and Design in 1999
- Mechatronics starting from 2002

This type of structure ranks the Faculty of Technical Sciences among the most highly developed technical institutions in the country.

Today, the Faculty covers an area of 30 000m² occupying the central position at the University campus on the river Danube. This area is divided into several neighbouring buildings: the F Block, the "Tower" building, the Teaching Block, the Research and Technology Centre, the amphitheatres, the Mechanical Engineering Institutes, the "TMD" building and the Large Systems Control Centre.

REALIZATION OF HIGH POSITION AMONG THE BEST
IS
THE VISION OF THE FACULTY OF TECHNICAL SCIENCES

The city of Novi Sad

The name Novi Sad means "New Planting" (noun) in Serbian. It is Serbia's second largest city, after Belgrade. In its most recent official census from 2002., the city had an urban population of 216.583, while its municipal population was 299.294. The city is located on the border of the Bačka and Sylvania regions, on the banks of the Danube river and Danube-Tisa-Danube Canal, while facing the northern slopes of Fruška Gora mountain.

Since it was founded in 1694., Novi Sad became the centre of Serbian culture and earned its nickname *Serbian Athens*. Today, Novi Sad is a large industrial and financial centre of the Serbian economy; and it is also one of the biggest construction sites in the region.
