Learners used

This was recognized

it entered, by the managing director of Regional Energy Agency, Ms. Moni Siniša, who made the inauguration of the study.

The location of each study unit

materials of the project worked in the final months of the project and gave concrete indications on the work that will be developed in the next future.

The revision and approval of the professional profile

of the main objectives of this meeting, which were debated by partners.

The kick-off meeting of the REACT project, was held on 15th September 2019, in Tartu (Estonia, Portugal), and brought together representatives of all the partners from the three main coordination countries: Croatia, Portugal and Estonia.

Both activities involved an overview of the study unit and the future organization of the tasks and the next steps. A highlight of the meeting was the elaboration of the project logo, which was then approved.

At this meeting, Zina Abela, from Portimão National Reference Agency; made a presentation about the financial and administrative aspects of Portuguese projects.

**PROJECT DEVELOPMENT**

The kick-off meeting of the REACT project, was held on 15th September 2019, in Tartu (Estonia, Portugal), and brought together representatives of all the partners from the three main coordination countries: Croatia, Portugal and Estonia.

Both activities involved an overview of the study unit and the future organization of the tasks and the next steps. A highlight of the meeting was the elaboration of the project logo, which was then approved.

At this meeting, Zina Abela, from Portimão National Reference Agency; made a presentation about the financial and administrative aspects of Portuguese projects.

**3rd** project meeting held in Estonia

REACT consortium met on the 2nd and 3rd of February 2020, in Rijeka, at the Croatian Chamber of Economy, where the 2nd project meeting, and the second partners’ meeting, was held. The management director of Regional Energy Agency, Ms. Moni Siniša, welcomed the participants, outlined the objectives of the project, and presented the future work plan.

Participants will create the scenarios and practical projects, that will assess the energy efficiency in buildings, in a virtual simulator, which will be validated by partners.

In the future, the revision and approval of the professional profile by the members of the consortium, will be debated by partners.

**4th** project meeting held in Croatia

REACT consortium met on the 27th of November and 28th of November 2019, in Koprivnica, Croatia, for the 4th project meeting. The partners were welcomed, and the project coordinator, gave the update on the work carried out in the previous months, and discussed the future work plan.

Participants will be trained on the virtual simulator and will take the final examination. The virtual simulator is designed to evaluate the energy efficiency of buildings.

They will be able to choose the scenario or the area where they wish to work, and the examination will be conducted in the virtual simulator, in the form of a quiz or a multiple choice test.

The game will give learners the opportunity to assess the areas where they should improve and the areas where their knowledge was effective.

The revision and approval of the professional profile by the members of the consortium, will be debated by partners.

**3rd** project meeting held in Estonia

REACT consortium met on the 4th and 5th of December 2019, in Rijeka, at the Croatian Chamber of Economy, where the 3rd project meeting, and the third partners’ meeting, was held. The management director of Regional Energy Agency, Ms. Moni Siniša, welcomed the participants, outlined the objectives of the project, and presented the future work plan.

Participants will create the scenarios and practical projects, that will assess the energy efficiency in buildings, in a virtual simulator, which will be validated by partners.

In the future, the revision and approval of the professional profile by the members of the consortium, will be debated by partners.

**2nd** project meeting held in Estonia

REACT consortium met on the 27th and 28th of November 2019, in Koprivnica, Croatia, for the 2nd project meeting. The partners were welcomed, and the project coordinator, gave the update on the work carried out in the previous months, and discussed the future work plan.

Participants will be trained on the virtual simulator and will take the final examination. The virtual simulator is designed to evaluate the energy efficiency of buildings.

They will be able to choose the scenario or the area where they wish to work, and the examination will be conducted in the virtual simulator, in the form of a quiz or a multiple choice test.

The game will give learners the opportunity to assess the areas where they should improve and the areas where their knowledge was effective.

The revision and approval of the professional profile by the members of the consortium, will be debated by partners.
