

3rd EPISTEP WORKSHOP
**“Delivering the Future of Mobile Communications,
Embedded Systems and Nano-Electronics”**

December 07, 2007
Thessaloniki, GREECE

The South East European Research Centre (Greece) in cooperation with the Association of IT Companies of Northern Greece (Greece) and URSIT Ltd (Bulgaria) are organising a workshop on Friday December 7, 2007 in Thessaloniki, Greece.

The workshop aims:

- To update participants on the activities of three European Technology Platforms (eMobility, ARTEMIS, ENIAC) and to demonstrate their utility for companies.
- To assist SMEs in matching their activities to the objectives of the FP7 Calls.
- To assess experiences from the first calls of FP7 and provide information about future participation.
- To bring company representatives together to explore the ground for collaborations.

Speakers include representatives from the European Commission (DG Information Society and Media) and FP7 National Contact Points.

The event is organised in the frame of the project “Enhanced Participation of SMEs in IST European Technology Platforms/EPISTEP” funded by the FP6 programme.

To **register** for the workshop and to view the programme please visit:
